

Extension Proposals and Scenarios for ClubUML

Xiang Cheng-CSYE7945-Spring2014

Usecase: Timeline Notification

Actor: Managers and Developers

Initial Condition: Managers and developers log in successfully and select a project or diagram.

Operations:

Managers create a timeline under a specific project.(A calendar will be assistance to show the schedule and timeline)

The timeline will specify some time nodes for the project or diagram, each node will be shown as a deadline, each phase has a deadline.

After submitting the product for this phase, the deadline disappears and the deadline for the next phase pops up.

Managers can change the timelines depending on needs.
