

# The policies to evaluate the use case diagram

By Bing Li, Yang Zheng, Chao Li

## General Rule:

1. Every Use case should have at least one actor.
2. Use Case must be verb.
3. Use case should follow a sequence.
4. Actor name should not be 'actor\*'.
5. Actor should be noun.

## User Defined Rule:

1. Use case include or extend other use case.
2. How many actors one use case should associate with? Maximum of actors.
3. User could define the
4. A use case must have only one initializing actor.
5. Use could define actors, use cases and association between them.

## Manager Rule:
