Author: Sahil Patil

Course: CSYE 7945 Software engineering project

The following ideas I present for extension of the project for the fall semester 2013

Bug fixing:-

- Tracking and fixing the bug should be high priority
- Exception handling should be resolved within program
- Track down the errors such 404, version of various software plan(tomcat version) etc

Future enhancement:-

- Centralized database for user to store data
- Provide chatting and messaging facility to the user to communicate with other user
- Provide secure login to the user
- Allow user to upload multiple diagram from UML
- User should be able to write down comments for UML diagram
- Java code export should be available for the user
- Separate security measures should be provided for guest user
- Allow user to change password as well as add reset capabilities.
